Smoke and Fog Fluids

Cloudy Professional products are designed to deliver amazing and safe effects for a wide variety of venues, from theaters to TV studios, dance halls, cultural and recreation spaces, concerts, night clubs, mega productions, military training, fire drills and airtightness tests in laboratories, or wind tunnels in automotive factories.

All of our fluids are manufactured with deionized water and USP food grade glycols, as well as rigorous filtration systems that make them safe and reliable.

All of our fluids are not toxic, they are not flammable, they do not cause eye or respiratory irritation, they do not generate greasy residues and they do not cover the heaters of the smoke machines.

Density **██████████**

The Cloudy Flash extra fast dissipating fluid was designed to simulate "vapor" or CO2 effects, such as cannons and jets of white smoke.

It is possible to create a white smoke blast and transform into semi-translucent in a few seconds until it disappears without marking the light beams in an ultra-fast way, imitating the characteristics of CO2.

All liquids in the Cloudy professional line are factory sealed with a security seal and a sealed aluminum lid.

Suitable machines:
All type of smoke machines.
Vertical shot smoke machines.

Security seal
