Smoke and Fog Fluids

Cloudy Professional products are designed to deliver amazing and safe effects for a wide variety of venues, from theaters to TV studios, dance halls, cultural and recreation spaces, concerts, night clubs, mega productions, military training, fire drills and airtightness tests in laboratories, or wind tunnels in automotive factories.

All of our fluids are manufactured with deionized water and USP food grade glycols, as well as rigorous filtration systems that make them safe and reliable.

All of our fluids are not toxic, they are not flammable, they do not cause eye or respiratory irritation, they do not generate greasy residues and they do not cover the heaters of the smoke machines.

Fluid type

Partly

Dispersion

Density

This H2O-based liquid was designed for FAZER type fog machines.

Designed and developed to generate a fine mist imperceptible to the eye, but effective when wanting to mark the light beams in a smooth and even way.

This formulation is the solution for TV studios where you need to highlight the lights, and not cover the camera lenses.

All liquids in the Cloudy professional line are factory sealed with a security seal and a sealed aluminum lid.

Suitable machines:
Water-based FAZER type fog machines.

Security seal
